ABOUT & WORK

Website & Software Developer

Geeksforgeeks(DP)

05/2022 - Present

Lucknow

I have good knowledge in web development and have an impressive track record of building various minor and major projects, including an e-commerce website, an online voting portal, participation in iulhackathon2022, a chatroom application, and a Netflix clone. I have also tested two Android apps, demonstrating my adaptability across platforms. My skill set encompasses MERN JS, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, GitHub, MongoDB, and MySQL. I am also well-versed in JAVA with DSA and OOPS. Coding, reading, and playing cricket are my hobbies, which further fuel my passion for continuous learning and well-rounded development as a software developer.

Academic Projects & Tasks

- simple Covid-19 Stats Tracker app
- weather stats website in python with API
- Online voting system website using PHP
- Notes archiver for students website using PHP
- IULH2022 Website using PHP

PERSONAL PROJECTS

Ecommerce with chatbot website using

PHP,HTML,CSS,JS,Bootstrap,MySql (05/2020 - 06/2022)

- Created a comprehensive E-Commerce platform with integrated chatbot features. Leveraged a variety of technologies including PHP, HTML, CSS, Bootstrap, payment gateway integration, MySQL, and APIs.

Netflix Clone in Recat JS (07/2023 - 08/2023)

- This Netflix Clone Project is a web application that mimics the features of the popular streaming service, Netflix. • It showcases a variety of movies along with their details and ratings, offering users a platform to explore and discover new content.

Chatroom app ,Firebase is used for backend

(04/2021 - 06/2021)

- The Chatroom App is a real-time messaging application that allows users to engage in conversations within various chatrooms. The app offers a seamless and interactive platform for users to exchange messages, share information, and connect with each other.
