Frameworks & Libraries: UIKit, SwiftUI, ReactJS, Redux, TailwindCSS

Developer Tools: Xcode, VS Code, Git, GitHub, Postman

PROJECTS

NewsApp | Github

Aug 2023 – Sep 2023

Swift, UIKit, AVFoundation, Kingfisher, UserDefaults, SafariServices

- **Implemented generic networking layer** to allow different data types to be used with the same logic without having to create a separate struct.
- **Image caching** with Kingfisher library to load image faster which enhanced the app's overall performance.
- **Integrate Safari behaviors** by utilizing SafariServices apple framework to enable the article in a web view with a UI which is almost identical that the Safari app provides.
- Used **AVFoundation to process audio** of the article summary with pause and play feature.
- **Offers offline reading** by storing article data locally using UserDefaults also it updates the article stored data every time the app launched.
- Develop custom UI components.
- Compatible with **light and dark mode**.
- Implemented **share option** for article.
- Powered the data layer with News API.
- Utilized the **MVC architecture** pattern to handle logic and user interface controls.

EXPERIENCE

Co-Founder

March 2021 – July 2021

mFresh

Imphal, Manipur

- Co-founded a B2C fresh veg & fruit delivery service through a mobile app, providing customers with fast and convenient delivery options.
- Building a strong network of partnerships with local suppliers to ensure a diverse range of products are available for customers to choose from.
