Profile

I am a skilled Data Analyst proficient in data collection, manipulation, analysis, and interpretation. My expertise in Python, SQL, MS Excel and Power BI allows me to extract valuable insights from data, create business intelligence metrics to answers complex business problems/questions and present them effectively through reports and visualizations.

Education

Post- Graduate Diploma, Economics
National Open University of Nigeria, McCarthy

Sep 2023 – July 2024

Projects

- **Wisabi Bank:** I utilized Python (Jupyter Notebook, Pandas, NumPy) for data cleaning and manipulation and MS Excel for analysis on this fiction financial company dataset where I identify common trends and insights, providing valuable input for service improvement strategies and I automate the dashboards by converting the dataset into tables.
- **Power BI Week:** Utilized Power BI to create interactive dashboards showcasing sales data, KPI's and product performance metrics
- **Adventure Work:** I played the role of a BI Consultant hired by Adventure Work where I restore database (BAK File) in SQL and create views to connect necessary tables to Power BI for analysis and I was able to identify trends, insights and give recommendations on how to grow the business in the regions it has low performance.
- **Onyx DataDNA Challenge:** In this challenge I analyzed Spotify most streamed songs in 2023.

Professional Experience

Data Analyst Intern

Oct 2023 – Present

MeriSKILL, Remote

- Data Analytics
- Presentations and Dashboards
- Established and tracked key performance indicators (KPIs)

Data Analyst Intern

Sep 2023 - Present

KPMG AU, Remote

- Automation
- Business Intelligence and Visualization
- Report Writing

Financial Fraud Investigator

Aug 2016 - Present

Economic and Financial Crimes Commission, Lagos

- Financial Data Analytics
- Intelligence gathering
- Open-Source Investigations (OSINT)

Certifications

Certified Data Analyst, WildFusion Digital Center

Certificate of Attendance (Power BI Dev), Power BI Experience

Badge (Chat GPT for Data Analytics), Maven Analytics

Certificate of Completion my SQL Basic, Great Learning

Certificate of Completion Excel for Beginners, Great Learning

Certificate of Completion Data Analysis with Python, FreeCodeCamp

CompTIA Security+ Certification, Cybrary

Skills

Technical

- Data Analysis: Familiarity with Python (Pandas, NumPy) for data manipulation and analysis.
- Data Visualization: knowledge of data visualization tools like power BI and MS Excel.
- Statistical Analysis: Understanding of foundational statistical concepts and hypothesis testing.
- Database Management: Exposure to SQL for querying and managing databases.
- Spreadsheets: Proficient in MS Excel for data entry, analysis and visualization

Soft Skills

- Problem Solving: Strong analytical and critical thinking skills.
- Communication: Exceptional written and verbal communication abilities
- Team Work: Strong interpersonal skills, fostering positive working relationships with colleagues and clients.
