English Hindi

## Internship

**Organization** : ONESPECT PRIVATE LIMITED  
**Duration** : 13th May 2022 - 30th Sep 2022

I did internship at ONESPECT PVT LTD. It was an internship of three months where I developed one module using HTML,CSS,JAVASCRIPT,BOOTSTRAP,PHP and MYSQL. The module is "Online Sponsor Management System". The Online Sponsor Management System is a comprehensive solution that allows organizations to efficiently manage their sponsorships and partnerships online. This module is designed to simplify the sponsorship process, from start to finish.

### Project Modules

#### Customer Registration Module :

Coding Language : HTML, CSS, BOOTSTRAP, JAVASCRIPT, JQUERY, PHP, MYSQL and AJAX.

**Description** : A customer registration module allows customers to create an account on our website. To register on your website, customers will typically be asked to provide basic information such as their name, email address, and password. Some websites may also require additional information such as their shipping address or phone number.

#### Vendor Registration Module :

Coding Language : HTML, CSS, BOOTSTRAP, JAVASCRIPT, JQUERY, PHP, MYSQL and AJAX.

**Description** : The main features of a vendor module for a floral website typically include the ability to add or edit product listings, manage inventory levels, view order details, and generate sales reports. Sellers can also use the module to track shipping and delivery status, and communicate with customers regarding their orders.
