Junior PHP Backend Developer

Highlight Summary

As a results-driven backend software developer, with about 2+ years of experience, I specialize in tackling complex challenges with a proven track record of delivering high-impact solutions. Known for my dedication to problem-solving, I consistently go beyond expectations to ensure project success. Throughout my career, I've demonstrated expertise in optimizing web applications using vanilla PHP, and two of the industry's leading frameworks, Laravel and Symfony.

I am a proactive team player and natural leader, excelling in people management and mentorship. With a keen focus on positive impact, I have a proven ability to transfer knowledge and empower team members, leading to a 15% increase in overall team productivity.

Skills
