PROJECTS

❖ IMPLEMENTATION OF HIGH-SPEED PARALLEL SELF-TIME ADDER

This project presents a parallel single-rail self-timed adder. It is based on a recursive formulation for performing multibit binary addition. The operation is parallel for those bits that do not need any carry chain propagation. It attains logarithmic performance over random operand conditions without any special speedup circuitry or look-ahead schema. Simultaneously have been performed using an industry standard toolkit that verify the practicality and superiority of the proposed approach over existing asynchronous adders.

INTERNSHIP

❖ APPLICATION DEVELOPMENT WEB AND MOBILE

- HTML5
- CSS
- BOOTSTRAP

- JAVASCRIPT
- MYSQL
- PHP

I completed an internship in APPLICATION DEVELOPMENT WEB AND MOBILE at try logic solutions. During this experience, I Gained valuable hands-on skills in html, Css, Bootstrap, JavaScript, MySQL ,Php . By this training we developed a optimized and custom Friendly website.

SKILLS

- Languages Known: C, Java, Python basics
- Database Known: MYSQL
- Front-end: HTML, CSS & Java Script
- Back-end: PHP
- Application Packages: M.S-Office
- Technologies Known: Android
