Work Experience

Front End Developer

AdsRole - Noida, Uttar Pradesh

July 2023 to Present

SDE

Iquestbee Pvt Ltd - Gurgaon, Haryana

June 2022 to August 2022

My role is to manage and maintain the Salesforce platform for an organization. This involves a range of responsibilities, including:

User Management: Creating and managing user accounts, roles, and profiles, setting up permissions, and managing security access.

Data Management: Ensuring data integrity, managing data migration, and creating and maintaining data backups.

Customization: Customizing the Salesforce platform to meet the organization's specific needs, including creating custom fields, objects, workflows, and validation rules.

Reporting and Dashboards: Creating reports and dashboards to provide valuable insights into the organization's sales and marketing performance.

Integration: Integrating Salesforce with other systems, such as marketing automation and customer service platforms, to streamline processes and improve efficiency.

Training and Support: Providing training and support to users, troubleshooting issues, and maintaining documentation.
