WORK EXPERIENCE

Wordpress Developer Senior Intern (Online Internship)

DailyTechSuggest

March 2023 - August 2023

- DailyTechSuggest is a startup organization that personally reviews and recommends Electronic gadgets and technologies including latest product that everyone uses in their day-to-day life. The website can be found [here](#).
- My responsibilities included increasing traffic on the website, taking backups of the whole website at regular intervals of time, changing the schema of the website from whenever required. I worked in a team of 3 members including the mentor.
- From this internship, I have learned various new things such as maintaining the overall website, restoring backups whenever the website unexpectedly shut down using hostinger, modifying the PHP code to activate the plugins of Google AdSense requests.
- From this internship, I have explored all the options available on the wordpress admin dashboard. I have worked with various plugins and themes such as Astra, Elementor, Gutenberg Editor, Google Stories, AAWP, and many more.
- My responsibilities also included of overviewing Google Analytics from time to time to monitor the overall bounce rate, site speed, number of views on latest published articles. In the span of 90 days, I increased over 90% of the traffic on the website.

PROJECTS

A Sample Restaurant Website (the fine dine)

- **Number of people involved** - 1
- **Technologies used** - WordPress
- **Duration** - 5 days
- **Responsibility** - Developing the website, Deciding the overall schema of the website, testing the overall website to find any bugs or broken links and fix them
- **Project Idea and features** -
 - The website was developed for an imaginary restaurant named "The fine dine" on my localhost system. The basic idea behind this project was creating a website for a restaurant where the user can reserve their seats in advance by selecting their choice of time and date.
 - The user can also visit this website to get the restaurant's location which are available in 2 mediums. The first one being a simple text and the second one being a Google Maps location.
 - The user can also use this website to leave a review after dining at the restaurant or to send a query message to the restaurant owners by filling out a simple form.
 - There are also gallery images available so that the user can get an overview of the whole restaurant.
 - The user can also choose to follow the restaurant's social media accounts on Instagram, Twitter, and Facebook.
- **Future Enhancements** -
 - Finding a plugin that can effectively store the input texts and display it without charging any cost.
 - Focusing on improving the overall loading time of the website in order to improve the user's experience on the website

SPORTS

- Chess (Interhouse tournament winner - 2018 , Interhouse tournament runners up - 2019)
- Cricket
- Football
- Swimming
- Badminton

SKILLS

Soft Skills

- Active Listener
- Adaptable
- Cooperative
- Organized
- Punctual
- Patient
- Problem Solver
- Team Worker

Hard Skills

- Java
- Python
- PHP
- WordPress
- Microsoft Office
- MySQL
- Adobe Photoshop
- Kdenlive
- HTML
- CSS
- Javascript

ACHIEVEMENTS

- Cybershadez Techfest Winner in IT Treasure Hunt (2023)
- Increased the traffic on DailyTechSuggest's website by roughly **1,22,000 users** in a span of 90 days. The highest being **8,294 users** in a day.

PROJECTS

Personal Safety Guide App

- **Number of people involved** - 4
- **Technologies used** - ReactJS, MongoDB
- **Duration** - May 2023
- **Responsibilities** -
 - Team Leader
 - Overseeing and managing all the ongoing activities ranging from UI designs to coding the app partially
 - Testing the features after the code was ready to execute.
- **Project Idea and features** -
 - Personal Safety Guide is an application that works on Android OS. It is a safety application that has total 3 use cases.
 - The first use case is that the application sends the live location of the user to 5 emergency contacts which were chosen by the user before time. The location is sent in form of an SMS text.
 - The second use case is that the application provides the nearby locations of hospitals, police stations and other emergency services.
 - The third use case is that the application provides effective as well as efficient tips with respect to certain life tips such as gas leakage, fire breakout, and many more.
 - The main feature is that the app and all its features are totally free to use and do not charge anything.
- **Future Enhancements** -
 - Including the validation in the login/signup by verifying user's details with the details stored in the database if the user is logging in.
 - Focusing on improving the overall user experience by improving the UI.
 - adding more effective and concise tips in the app.

CERTIFICATION COURSES

Graphic Designing Masterclass

- **Technologies** - Adobe Photoshop, Adobe Illustrator , and Adobe InDesign
- **Duration** - September 2022 (30 hours)
- **Platform** - Udemy

Artificial Intelligence Introduction

- **Technologies** - Python (Pandas and NumPy library) and Introduction to Natural Language Processing (NLP)
- **Duration** - 10th March 2022 - 10th April 2022 (1 Month)
- **Platform** - AcmeGrade

LUDIFU Student Partner Program

- **Skills learned** - Introduction to various skills such as HR, development, and Marketing.
- **Duration** - 13th March 2022 - 26th March 2022 (14 Days)
- **Platform** - Let Us Do It For You (LUDIFU)

INDUSTRY VISIT

- **e-Infochips**
 - **Duration** - 1 Day
 - **Location** - Ognaj, Ahmedabad
 - **Company** - eInfochips, an Arrow company, is a product engineering and semiconductor design services firm, specializing in digital transformation and connected IoT solutions across various cloud platforms.
 - **Learning** - During my first industrial visit, we were shown various projects which were being developed such as locking system, authorization system that takes 3 steps which were fingerprint scanning, number code, and an ID scanner. I also gained new perspective on various IOT devices.

CERTIFICATION COURSES

Introduction to Javascript

- **Skills learned** - Introduction to basic concepts of Javascript such as types of prompt boxes, comments, variables, and many more.
- **Duration** - 12th July 2023 - 29th July 2023 (17 Days)
- **Platform** - SPACE Kodacy

TECHFEST/HACKATHONS VISITS

Cybershadez 2023

- **Institute** - GLS College,
- **Duration** - 24th February - 25th February 2023
- **Event** - Code Jigsaw
- **Description** - Organizing code in a proper manner under limited time period.
- **Result** - Third Runners up

Cybershadez 2023

- **Institute** - GLS College,
- **Duration** - 24th February - 25th February 2023
- **Event** - IT Treasure Hunt
- **Description** - Solving various types of questions such as Coding, Decoding, Logic based puzzles in a first-come-first-serve time limit.
- **Result** - Winners

National Level Edu-techfest

- **Institute** - LD College of Engineering
- **Duration** - 27th April - 29th February 2023
- **Event** - Debug IT
- **Description** - Finding Errors in the given code under limited time.
- **Result** - Participated

Mircosoft Power BI

- **Platform** - Let Us Do It For You
- **Duration** - 12th April 2023
- **Mode** - Online
- **Description** - An introductory session to Microsoft Power BI for data visualization
- **Result** - Participated
