LGA : Egbado North Ilugun asalu

### SUMMARY

Being a full stack developer working and professional in both front end and back has added alot of value to companies and also individual. Giving me the boldness to solve problems that pertains to the front end and back end of a software, also being a firebase cloud computer is the icing on the cake giving me the ability to manage a software with both code based server as cloud based server. Making it a complete and perfect dish on a company's table.
