Responsibilities Included

PRE-ANESTHETIC PREPARATION AND EVALUATION OF THE PATIENT:

- Obtaining an appropriate health history including biophysical and psychosocial data
- Conducting an appropriate physical screening assessment
- Recommending or requesting an evaluating pertinent diagnostic studies.
- Selecting, obtaining, ordering, or administering pre-anesthetic medications
- Documenting the pre-anesthetic evaluation and obtaining informed consent for anesthesia

INTRAOPERATIVE CARE:

- Obtain, prepare, or utilize all equipment, monitors, supplies and drugs used for the administration of anesthesia; perform or order safety checks as needed.
- Selecting, obtaining or administering the anesthetics, adjuvant drugs, accessory drugs, and the fluids necessary to manage the anesthetic, to maintain the patient's physiologic homeostasis, and to correct abnormal responses to the anesthesia or surgery.
- Performing tracheal intubation and extubation and providing mechanical ventilation.
- Performing and managing regional anesthetic techniques including, but not limited to, subarachnoid, epidural and caudal blocks; plexus, major and peripheral nerve blocks; intravenous regional anesthesia; transtracheal, topical and local infiltration blocks.
- Providing appropriate perianesthetic invasive and non-invasive monitoring utilizing current standards and techniques and responding to abnormal findings with corrective action.
- Recognizing and treating cardiac dysrhythmias through the use of Perianesthetic electrocardiogram monitoring.
- Recognizing abnormal patient response during anesthesia, selecting and implementing corrective action and requesting consultation whenever necessary.
- Managing the patient's fluid, blood, electrolyte and acid-base balance.
- Evaluating patient response during emergence from anesthesia and instituting pharmacological or supportive treatment to insure the adequacy of patient recovery from anesthesia and adjuvant drugs.
- Providing anesthesia care consistent with infection control and anesthetic safety principles in order to prevent the spread of disease and prevent harm to the patient, the anesthetist and others in the anesthetizing environment.
- Documenting, as part of the medical record, all aspects of anesthesia related care in a thorough and timely fashion.

POST-ANESTHESIA CARE:

- Providing a thorough report of the patient's psychological and physical condition, perianesthetic course and anticipated problems to the postanesthetic health care provider who assumes the patient's care following anesthesia.

- Providing post-anesthesia follow-up and evaluation of the patient's response to anesthesia and for potential anesthetic complications, taking appropriate corrective actions and requesting consultation whenever indicated.
- Initiating and administering respiratory support to insure adequate ventilation and oxygenation in the immediate post-anesthesia period.
- Initiating and administering pharmacological or fluid support of the cardiovascular system during the immediate postanesthesia period to prevent perianesthetic morbidity and mortality.
- Releasing or discharging patients from a post-anesthesia care area.

PERIANESTHETIC AND CLINICAL SUPPORT FUNCTION:

- Inserting peripheral and central intravenous catheters.
- Inserting pulmonary artery catheters.
- Inserting arterial catheters and performing arterial puncture to obtain arterial blood samples.
- Identifying and managing emergency situations, including initiating or participating in cardiopulmonary resuscitation that involves airway maintenance, ventilation, tracheal intubation, pharmacologic cardiovascular support, and management of blood, fluid, electrolyte and acid-base balance.
- Providing consultation and implementation of respiratory and ventilatory care.
- Initiating and modifying pain relief therapy utilizing drugs, regional anesthetic techniques or other accepted pain relief modalities.
- Selecting, ordering, or administering medication and treatment modalities related to the perianesthetic care of the patient, with consultation or collaboration when appropriate.
- Accepting additional responsibilities appropriate to the practice setting, which are within the expertise of the individual CRNA.
- Perform any other procedures, which the CRNA has been educated to perform.
