## WORK EXPERIENCE

### FREELANCER

Remote, United States

#### Web 3 Website designer

March 2023- Present

- I specialize in creating immersive 3D user interfaces that captivate and engage website visitors.
- My design process revolves around understanding and addressing user needs and preferences
- Collaboration is key in my work. I work closely with clients to understand their unique requirements and objectives.

### Attended HNG Bootcamp

2022- 2022

- Attempt Task given, collaborate with other designer and create our group Logo
- Hop on a personal task and got promoted to the next stage
- Collaborate with other designer to design a website from the Design System.
- Designed the website task givens to me by my team, inspected by my teammate and Mentor in charge
- Collaborated with developers to implement and launch the design.

### Create my first mini case study

April-May 2023

#### Jewellery Website (Responsive) JEWELLERY

- The journey began with comprehensive research, aimed at understanding the intricacies of the Jewellery market and the expectations of users.
- Based on the research, the next step involved defining a clear and actionable problem statement, how to create a Jewellery website that entices users and maximizes conversions.
- Brainstorming creative solutions to address the defined problem.
- Feedback was gathered to pinpoint areas for improvement. The design was readjusted to address the feedback I received.
