+2349045310883

An adept Front-end developer with over 2 years programming experience and passion for web design and development along with hands on experience in designing, implementing, and rigorously testing highly responsive user interface components.

Work Experience

Frontend Developer

Chequebase.io

June 2023 - Current

- Translated the UX designs into responsive, interactive features, using Next.js, React, Typescript, Tailwind CSS, Stitches/React.
- Development of the Financial Management Software chequebase.io and integration of API using Next.js and React Query.
- Standardized every output using a fresh, mobile-first approach method that is responsive. (Custom-built, screen-adaptive Flexbox components).
- Developed efficient and reusable front-end components to initialize frontend projects across the entire organization, ensuring consistency and streamlined development processes.
- Built and integrated a state project (web app with user roles and access levels).
- Engaged in collaborative development with fellow developers to conceptualize, design, and develop the website, user-dashboard and admin-dashboard.
- Identify API flow problems when integrating APIs and notify the backend team for optimization.
- Collaborated with other team members and stakeholders in Switzerland and Berlin to ensure API's meet required specifications from the requirement.

Frontend Developer

Ocelot Group

June 2023 - Current

- Ensured the technical feasibility of UI/UX designs.
- Translated the UX wireframes and mockups into responsive, interactive features, using React, Styled components, vanilla JavaScript, React-redux toolkit.
- Led the frontend team and worked along side backend engineers to build a gaming platform.
- Standardized every output using a fresh, mobile-first approach method that is responsive. (Custom-built, screen-adaptive Flexbox components).
- Built and integrated a state project (web app with user roles and access levels).
- Identify API flow problems when integrating APIs for the gaming platform and notify the backend team for optimization.
- Collaborated with other team members and stakeholders from United Kingdom and the United States to ensure API's meet required specifications from the requirement.

Frontend Developer

SmadeandSmight

May 2022 - Current

- Translated the design team's UX wireframes and mockups into responsive, interactive features, using React and Redux, CSS (with SASS), React UI libraries (including Ant-Design), Styled components, vanilla JavaScript.
- Integrated APIs using react/redux and ensure proper JSON formatting for API response with text format from the API.
- Standardized every output on the client side using a fresh, mobile-first approach method that is responsive. (Custom-built, screen-adaptive Flexbox components).
- Spot out API flow issues during the integration of APIs on the merchant and client-side and report to the backend team for optimisation.
- Built and oversaw the front-end development of the website built for clients and merchants for the lifestyle product - **myhangout.co**.
