## OBJECTIVE

A curious and passionate individual, who is eager to learn and dive deep into the subject matter.

## EDUCATION

### **Bharati Vidyapeeth Institute of Computer Applications and Management 2021-ongoing**

- Masters of Computer Application | Percentage: **83.60%**

### **Dr APJ Abdul Kalam University, Indore 2017 - 2020**

- Bachelors of Science(Computer Science) | Percentage: **68.31%**

### **kendriya vidyalaya, Mhow(MP) 2016 -2017**

- Class 12 (CBSE Board) | Percentage: **62.80%**

### **kendriya vidyalaya, Mhow(MP) 2014 -2015**

- Class 10 (CBSE Board) | CGPA: **8.6**

## SKILLS

**Proficient** in C, C++

**Familiar** with, HTML, CSS, JavaScript, DBMS, MySQL, React-Redux

**Tools :-** Figma{plugins(anima/Locofy Plugins), Prototyping, Wireframing, Interaction Design, Visual Design, Responsive Design }

## PROJECTS

### **Amazon Clone - Fullstack Web Application**

**Tech Stack:** HTML, CSS, JavaScript, Express, React-Redux, Stripe, Firebase

1. **E-commerce Platform:** Developed a fullstack e-commerce web application with React for the front end and Firebase for backend functionalities, including user authentication, product management, and database storage.
2. **Secure Payment Integration:** Integrated Stripe payment gateway for secure and seamless payment processing, allowing users to make purchases and simulate real e-commerce transactions.

3. **Cart Management:** Implemented a user-friendly shopping cart system enabling users to add and remove items, providing a comprehensive online shopping experience, and demonstrating proficiency in development and database management.

## **Parallel Chat - Collaborative Messaging Application**([link](#))

**Tech Stack:** HTML, CSS, JavaScript, React, Firebase, Express

1. **Multi-User Chat:** Designed and developed a real-time messaging platform, "Parallel Chat," allowing users to engage in simultaneous conversations with multiple individuals, promoting efficient communication.
2. **Google Login Integration:** Implemented Google login authentication to enhance user accessibility and security, simplifying the onboarding process and ensuring user data protection.
3. **Firebase Database:** Utilized Firebase for database management, enabling seamless storage and retrieval of chat messages, user interactions, and real-time updates, showcasing proficiency in modern web development tools and technologies.

## **Doctor Search Website** (responsive prototype)

**Tech Stack:** Figma with locofy.ai Plugin
