Web Developer

A developer who is highly skilled and creative professional who specializes in designing, building, and maintaining software applications, websites, and digital solutions. We are adept at various programming languages, frameworks, and tools, and they play a crucial role in shaping the way we interact with technology, making our lives more efficient .

Education

- **Bachelor In Engineering**
University Of Benin, Edo State, Nigeria From August 2017 to January 2023
- **Electrical and Electronics Engineering**
University of Benin , Edo State, Nigeria From July 2017 to January 2023

Work experience

- **INTERN**
Edo Innovates, Edo From April 2022 to February 2023
Designed and Modified Working Websites for the Organization:
 - In my role, I had the opportunity to design and modify several websites crucial to our organization's online presence.
 - This involved creating visually appealing and user-friendly layouts while ensuring seamless functionality across various devices and browsers.
 - The modifications not only enhanced the aesthetics but also improved the overall user experience.**Modified and Redesigned Counter Clock System:**
 - I took on the task of modifying and redesigning our counter clock system, which plays a pivotal role in our operations.
 - The goal was to streamline and optimize its functionality to better meet our organizational needs.
 - Through this effort, we were able to create a more efficient and reliable system that contributed to improved productivity and accuracy.**Created User-Friendly and Workable Website:**
 - I spearheaded the creation of a user-friendly website that catered to the needs of our target audience.
 - The emphasis was on making the website easily navigable and ensuring that users could find information quickly and effortlessly.
 - The end result was a website that not only met user expectations but also facilitated smoother interactions and conversions.
- **WEB DEVELOPER**
Edo innovates , Benin City, ED, Nigeria From May 2022 to December 2022
Developed a Functional Commercial Website:

Successfully designed and implemented a fully functional commercial website, demonstrating expertise in web development, including front-end and back-end technologies.

Designed and Optimized Digital Calculator:

Creatively designed and optimized a digital calculator application, highlighting strong problem-solving skills and proficiency in software development.

Produced High-Quality Code: Wrote well-structured, testable, and efficient code by adhering to best software development practices, ensuring the reliability and maintainability of software solutions.

Work experience

JUNIOR WEB DEVELOPER

NAIJA KOBO, Lagos From January 2023 to July 2023

- **Coding and Development:**
 - Writing, testing, and maintaining code for websites and web applications.
 - Implementing front-end (HTML, CSS, JavaScript) and back-end (server-side scripting, databases) components.
 - Collaborating with team members to develop and troubleshoot web features and functionality.
- **Web Design and UI/UX:**
 - Assisting in the creation of website layouts and user interfaces (UI).
 - Ensuring that web designs are responsive and user-friendly across various devices and screen sizes.
 - Implementing design elements and maintaining consistency with branding guidelines
- **Testing and Debugging:**
 - Conducting testing and quality assurance to identify and fix bugs, errors, or issues in web applications.
- **Collaboration:**
 - Working closely with senior developers, designers, and other team members to execute project requirements.
 - Participating in team meetings and contributing ideas and solutions to development challenges.
- **Learning and Skill Development:**
 - Staying up-to-date with the latest web development technologies, trends, and best practices.
 - Expanding technical skills in programming languages, frameworks, and tools commonly used in web development.
- **Documentation:**
 - Creating and maintaining documentation related to code, development processes, and project requirements.
 - Ensuring that code comments and documentation are clear for future reference

Skills

User-Centric Web Development:

Capable of building user-friendly websites for task management from scratch, emphasizing usability and accessibility to enhance task organization and productivity.

Interactive Web Design

Skilled in designing and developing interactive features, including a counter time machine, showcasing creativity in web user experience (UX) design and functionality.

Website Cloning

Experienced in replicating complex web interfaces, including cloning a Netflix page, demonstrating a deep understanding of front-end web development and design principles.

Software Development

Proficient in software development, with a strong foundation in programming languages such as JavaScript, and Java, enabling the creation of custom applications and solutions.
