PROFILE

As a data analyst with four years of experience in the industry, I have successfully applied my skills and knowledge to various data-related projects at my current company. My main responsibilities include collecting, cleaning, querying and analyzing data from different sources using Excel, SQL, R, and python. I have a strong command of these tools and can handle large and complex datasets efficiently and accurately. I have also developed dashboards and reports to communicate insights and recommendations using Tableau and R Shiny package to stakeholders and clients. I have a keen eye for data visualization and can create clear and compelling charts and graphs to convey the key findings and implications of the data. I enjoy finding patterns and solving problems with data, and I am eager to learn new skills and technologies to enhance my performance. I am a motivated and reliable team player who can collaborate well with others and deliver high-quality results.
