Certifications

● MCSD: https://www.youracclaim.com/badges/10659bf6-88df-4882-b7f1-1c5f4c8e5c02

Technical Skills

Skills	C#, Asp.net Webforms, Asp.net MVC, Asp.net Core, Asp.net Web API, WPF/Windows, Xamarin, Umbraco CMS, DNN CMS, EPI Server CMS, Jquery/Javascript, Angular, Backbone js
Operating System	Windows 7/8/10
Database	SQL Server, MySQL Server, MongoDB
Tools	Visual Studio, VS Code, SQL Management Studio
Other	MS Azure, Amazon AWS, GoDaddy, 1and1, Hostgator

Role & Responsibilities

- Handling Project and Team
- Client communication
- Closely worked with Analysis, Design, and quality assurance teams for various projects.
- Maintain coding standard
- Expertise in client-side and server-side architecture
- Analyze system specifications and translate system requirements to task specifications
- Project estimation

Projects

1. **Name**: Compass

   Description:
   This site relates to property selling in which includes agent and buyer 1. It includes SSIS Job which fetches property listing and its images throughout the day from the web service passing such parameters.
   2. Every night Run the SSIS package and store data in the database
   3. Get blob images from web service and convert them into the images with the physical path.
   4. Using the data listing on the web page

5. Server migration of the database, the whole site, and 500 us SSIS jobs. Convert DTS to SSIS.

Tools & Technologies:
Window service, Classic asp, C#, ODBC, SSIS, HTML, CSS, JScript, and SQL Server

2. **Name**: Ninety

Description:
This project has the functionality to improve the growth in terms of personality, positivity. It is the learning system where users will register through the system and can participate in various exercises based on different skills. Each user will assign different coaches who will monitor their exercise review and provide the feedback area to improve. Users can share post/like/comment with the entire Ninety community.

Tools & Technologies:
Asp.net Core 2.2, Angular6, SQL Server

3. **Name**: Office Atlas

Description:
This application is always searching for products and services that allow the real estate community to be more productive and profitable, so nowhere will you find a better outlet to showcase your products and services.
Our single mission is to bring our community of members accurate and detailed development information about office buildings across the Southwest, along with better solutions to all businesses that deliver products and services to the commercial audience. It is our best outlet for providing relevant, timely content for the intended audience.

Tools & Technologies:
C#, ASP.NET Dev Express, ASP.NET Web Forms, and SQL Server

4. **Name**: Deaf Plus

Description:

Deaf Plus is an accessible world for deaf people, with barriers to participation and opportunity removed. Our mission is to empower deaf people to take control of their own lives, by developing their potential and supporting them to achieve independence.

There are two types of users:

1) Normal User: Normal User will book the appointment with the advisor and see the booking history details like call details. Normal Users will do the call using Zoom through the website.

2) Advisor: Advisor will see the appointment details and user details. Advisor will use the zoom call to talk with the user through the website.

Tools & Technologies:

Umbraco, ASP.NET MVC, and SQL Server

5. **Name**: Student Management System

Description:

The client has the windows application which runs over 150 different organizations in the market, and we developed a web application to replace the windows app. The web application has been designed specifically for high schools, colleges & universities.

With this software you can:

- Monitor students waiting in your lobby
- Track student wait times
- Track average session times
- Run daily, weekly & monthly reports
- Allow students to sign themselves in Text students waiting to be seen
- Real-time reports
- Live chat

Tools & Technologies:

MVC 5, Dev Express Reporting, Signal R (live chat), and SQL Server
