Github - github.com/abhinavsingwal

Portfolio-<https://abhinavsingwal.github.io/portfolio/>

SKILLS

Programming Languages - C, C++, Java, Python, JavaScript, Html, CSS, MySQL

Technologies - IoT , Web Development and Machine Learning using Python

Frameworks and Libraries - React.js, Django, Flask, JQuery, Bootstrap5

Operating Systems - Mac, Windows and Linux/Unix

Python Libraries - Numpy, Pandas, BeautifulSoup, Selenium, OpenCV

Server - Unix/Linux Server

IDEs - VS Code, Pycharm and Android Studio

Certificates

Crash Course On Python - Google

Data Analysis with Python - Free Code Camp

Responsive Web Design - Free Code Camp

Scientific Computing with Python - Free Code Camp

PROJECTS

Shopping App — *Bootstrap5, Django*

An ecommerce app allows users to shop online, browse product catalogs, create wish lists, add items to a cart, and complete purchases. It also provides payment processing, shipping, and order management capabilities. I am currently working on this project.

https://github.com/abhinavsingwal/e-commerce_app_django

Authentication System — *Bootstrap5 and Python Django*

Authentication is the process of verifying a user or device before allowing access to a system or resources. In other words, authentication means confirming that a user is who they say they are. This ensures only those with authorized credentials gain access to secure systems.

<https://github.com/abhinavsingwal/Django-Authentication-System>

Responsive Website — *Bootstrap5 and Python Django*

A task manager app is an application or tool that lets you plan, organize and prioritize all your tasks so that you can finish them within the limited time frame and in the most efficient manner. Essentially, as its name suggests, it is an app to manage your tasks efficiently.

<https://github.com/abhinavsingwal/ToDo-List-Django>

Weather App — *Bootstrap5 & Django*

Weather app that uses Django as backend. Django provides a Python Web framework based web framework that allows rapid development and clean, pragmatic design. Weather app that uses Django as backend. Django provides a Python Web framework based web framework that allows rapid development and clean, pragmatic design.
