CPR Certification

Additional Information

It has been my personal goal during my time as a CNA to work in a hospital setting. In my ten years of working my priority was to learn as much as possible. I accomplished this by working in skilled rehab hospice memory care and home health. As I continue to love the work I do, my goal is to work in a hospital. I am certain that my years of learning as much as possible will help me find the right fit, the right unit and the right team of co workers to do what I love, providing excellent patient care.
