## WORK EXPERIENCE

### Ivy Benefits Pvt. Ltd.

Software Engineer

New Delhi

Jan 2023 - Present

- Proficiently managed UI development using HTML, CSS, JavaScript, and ReactJS within a dynamic startup environment.
- Led the end-to-end front-end development of the company's web application, ensuring its successful deployment.
- Collaborated seamlessly with cross-functional teams to align the web application with company objectives.
- Achieved a successful production deployment, significantly improving user experience and overall performance.

### Rose I.T. Solutions Pvt. Ltd.

Frontend Developer

New Delhi

Nov 2021 – Jul 2022

- Managed UI development using HTML, CSS, JavaScript, and ReactJS, ensuring seamless user interfaces.
- Implemented reusable components to optimize code efficiency and enhance the speed of the web application.
- Collaborated effectively with the team to deliver high-quality, scalable solutions.
- Demonstrated expertise in creating engaging user experiences, resulting in improved user satisfaction and retention.

### TATA Power

Marketing Analyst

Virtual

Sep 2020 - Oct 2020

- In this Internship, I have learned the concepts of marketing, analysis, and public dealing.

## PROJECT

### Food Ordering WebApp

- Developed a small-scale clone of a food ordering website with food cards that seamlessly interact and provide real-time updates using React components and state management.
- Implemented food cards with seamless interaction and real-time updates using React components and state management (Redux/React Context API). Enabled simultaneous cart updates for multiple users.
- Implemented user authentication and authorization mechanisms to ensure secure access to user-specific carts and personalized experiences. Also implemented form validation and error handling techniques to enhance user input accuracy and provide meaningful feedback in case of errors or invalid data.

## ACHIEVEMENTS

### Google Code Jam 2021

- Scored 23 Points in the qualification round.

### Google hash code 2021
