Physical/Psychiatric Assessment of Patients

Registered nurse working in the crisis response center of the nation's oldest psychiatric hospital as an assessment charge nurse.

-Primary duties are to complete intake assessments within 30 minutes on all voluntary and involuntary patient's ages 13 up to older adults. I care for patients with a wide array of psychiatric and substance abuse disorders. I carefully assess the medical status of all patients and work directly with our psychiatrist to determine if patients need medical clearance before they can be seen for psychiatric care. I work directly alongside case management to ensure patients receive the most appropriate level of care or need to be referred out to a substance abuse facility. I administer PRN and standing psychiatric and medical medications while patient are under my care. I supervise and delegate appropriate responsibilities to LPNs and MHTs on a as needed basis.
