● ADDITIONAL INFORMATION

PROJECTS

5 JUL 2023 – CURRENT

Property Listing Web App This web app developed with Laravel focuses on helping users find properties (homes, office spaces, lands, shops etc) for either rent or purchase. Real estate can create accounts on the app and upload their properties. Once that is done, the properties will be listed on the site for users to see. It's still hosted on my pc, hence the youtube link, The project will soon be going live.

8 DEC 2021 – 9 NOV 2022

Online Law Library This web app developed with Laravel aimed at making law practise digitally easy and fun. People into law practise do a lot of references to past cases and other law related materials, and this can be very cumbersome as the are pressured to go through loads of books and report.

This app contain many law reports and law books, that makes it easy for lawyers to easily find the particular content they need through it's search query.

It's a paid application. Users will have to pay to have access to it's contents. I'm still making some updates to the app
