- C and SQL
- HTML,CSS, JAVASCRIPT, BOOTSTRAP and JQUERY
- Core Java,Advance Java,Spring MVC,Spring Boot
- Decision Making ,Observant, Analysis,Problem Solver

PROJECTS

- **Smart Drone with Location Tracking,Camera Visuals And Remote Control**
The aim of our project is to create a smart drone which will be able to track location using GPS and GSM, will be able to capture images using its on board camera, self-drive itself with autopilot, will be able to carry load with the help of its hangers and can be controlled using a remote Android app.

- **Street Light Glow On Vehicle Movement**

In this MiniProject As for today's Technology and Need to save and conserve energy we come with the idea of automation in Street lights which will automatically on and off with the movement of vehicle. And during daytime it will be off because of sunlight. We have done this project by using arduino uno r3 ,led, lcd, ir sensor's. The Design and simulation is done on Proteus.

- **Advanced GPS based Bus Display**

For Security and Low Costing We Generated a LED Bus Display Which Has GPS Tracking System Connected. Purpose Of This Project Is To Improve Some Features Of Display And Add Security And Manage Costing. We use All Low Price Equipments And Parts To Design This Project Which Costs Us Very Less. We Also Used All User Friendly Parts And Design it As So Everyone Can Able To Use And If Wants to Change Then Able To Regenerate The Programs For Required Changes.
