EDUCATION

University of Portharcourt | Faculty of Engineering

● B.Eng Civil Engineering   *Aug 2015 – May 2020*

Open Weaver

● Javascript Certificate   *Jan - 2023*

SKILLS

- **Proficient:**PHP, Laravel, JavaScript, Nest.js, Node.js, React.js, Redux, MongoDB, Express.js, wordpress
- **Intermediate:** Git, EJS, Bootstrap, Python, CSS,, HTML,Adobe XD
- **Beginner:** Flask, Django, Adobe Illustrator, Adobe InDesign,

WORK EXPERIENCE

Supremeweb – *Full Stack Developer*   *June 2021 – May 2023*

- Web Application Development: Developed robust web applications using PHP and Laravel, leveraging the MVC architecture to ensure clean and maintainable code.
- Frontend Development: Spearheaded the creation of dynamic and user-friendly interfaces with React, enhancing the overall user experience and interactivity of the web applications.
- 'RESTful API Development: Designed and implemented RESTful APIs in Laravel, facilitating seamless communication between the frontend and backend components of the applications.
- Database Management: Managed and optimized databases, utilizing technologies like MySQL, to ensure efficient data storage and retrieval, resulting in improved application performance.
- User Authentication and Authorization: Implemented secure user authentication and authorization systems using Laravel's built-in features, enhancing data security and user privacy.
- Third-Party Integrations: Successfully integrated third-party services and APIs into web applications, expanding their functionality and improving overall user satisfaction.
- Performance Optimization: Conducted performance audits and implemented optimizations to ensure fast load times and responsiveness, resulting in a smoother user experience and increased user engagement.

BlueEdge consulting - London – *Full Stack Developer*   *Sep 2019 – May 2021*

- Full-Stack Web Development: Proficient in building end-to-end web applications using the MERN stack, from database design to frontend development and deployment.
- RESTful API Development: Developed robust and scalable RESTful APIs with Node.js and Express.js, enabling seamless communication between the frontend and backend of applications.
- Frontend Mastery: Created interactive and user-friendly interfaces using React.js, ensuring a responsive and engaging user experience across various devices and browsers.
- Database Design and Management: Designed MongoDB schemas and managed NoSQL databases efficiently, optimizing data storage and retrieval for high-performance applications.
- Server-Side Logic: Implemented server-side logic in Node.js to handle user authentication, authorization, and business logic, ensuring data security and application functionality.
- Deployment and DevOps: Proficient in deploying MERN applications to cloud platforms (e.g., AWS, Heroku) and utilizing CI/CD pipelines for automated testing and deployment. Troubleshooting and Performance Optimization: Diagnosed and resolved technical issues, conducted performance audits, and implemented optimizations to enhance application speed and reliability.

Techdom – *Back-End Engineering Intern*   *June 2017 – Aug 2018*

- Web Development Skills: Gained hands-on experience in web development by working with HTML and CSS to create visually appealing and responsive web pages.
- PHP Development: Developed and maintained PHP-based web applications, enhancing functionality and contributing to the company's digital presence.
- Database Integration: Integrated PHP with databases (e.g., MySQL) to facilitate dynamic content generation and data-driven web applications.
- Frontend Design: Collaborated with the design team to implement user interface designs, ensuring consistent and visually appealing layouts using HTML and CSS.
- Debugging and Troubleshooting: Developed proficiency in debugging and troubleshooting issues within PHP code and web layouts, ensuring smooth and error-free user experiences.
- Content Management: Assisted in managing and updating website content, ensuring that information remained accurate and relevant to the company's target audience.
- Team Collaboration: Worked effectively as part of a cross-functional team, contributing to project discussions, providing technical input, and delivering solutions that met project objectives and deadlines.

PROJECTS

Elkqr QR code generator   **Live Site**

Elkqr.com allows you to customize QR codes for a variety of purposes, whether it's for your business, personal brand, or a special event. With user-friendly features and a sleek interface, you can quickly generate QR codes with your desired content, such as website links, contact information, or even Wi-Fi access details.

TV Broadcasting APP A.I (php, React.js)   **Live Site**

World's First "AI" App That Lets Us Own A TV
 Channel That Gets Millions Of Views...
username: nosken11@gmail.com , password: Success@23

E-commerce Website -Next.js & Sanity CMS & Stripe   **live site**
Users can pay for their bought products with stripe.
(use stripe.js demo card number for now)
Users can feel a fully responsive shop site with
various products.
Each product has a details page.
User can add to a card or directly buy a product.

Blogging App -MERN   (CRUDE)   **live site**
Admin can create post
Admin can edit post
Admin can delete post

Responsive Movie Website-React.js & TMDB API   **Live Site**

Easily search for movies and tv series.
Movies and tv series are categorized by their
specialty.
Each movie and tv series have a details page.
Users can only view the latest trailer of the specific
content.
