Competencies

Web Development (Full Stack)

Project Management

Professional summary

I have, over a 5-year career in tech, worked on several web projects at various scales. I have played an essential role in developing and improving an array of digital products and services across different industries; from fintech, to educational software and Ecommerce. I am keen on empowering teams to achieve software development breakthroughs that increase business efficiency and user experience.

Work Experience

Backend Developer — 05/2023 – 10/2023
Greentech Communications and Networks Limited, Owerri.

- Introduced testing to a legacy codebase.
- Set up CI/CD pipelines.
