WORK EXPERIENCE

Texas Health Family Care

October 2015 to November 2020, August 2022 to present

Family Nurse Practitioner

- Diagnosed and treated patients from infancy to adulthood
- Conducted comprehensive physical exams, including well woman exams, and ordered diagnostic tests and procedures
- Carefully analyzed lab results, radiograph results, and information gathered during examinations to properly diagnose both acute and chronic illness
- Provided teaching and counseling to patients and families
- Referred to specialty provider as patient needs arise
- Met demands of a fast-paced clinic with both a walk-in population and scheduled appointments
- Communicated regularly with supervising physician to optimize patient outcome

Oscar Medical Group

November 2020 to July 2022

Virtual Primary Care Nurse Practitioner

- Provided primary care to members of Oscar Health Insurance aged 18+ via video and phone visits
- 10% of patient care was in person conducting EKG, pap smears and diabetic foot exams, as well as evaluation for abdominal and MSK pain
- Regularly reviewed: Lab results, consult notes, imaging results
- Offered white glove communication service to patients by having ability to chat directly with them through the Oscar app
- Worked closely with product team to assist in introduction of a new EMR while introducing a new virtual primary care health program to thousands of members

Texas Health Resources Harris Methodist Hospital

November 2012 to October 2015

Registered Nurse-Emergency Room

- Performed focused patient assessments on wide range of ages and levels of illness
- Monitored patient status and made interventions as appropriate
- Facilitated communication and teaching with patients based on need
- Administered medications after education on reason for use

Texas Health Resources Harris Methodist Hospital

January 2011 to November 2012

Registered Nurse-Ortho-Trauma Unit, Medical Surgical Residency

- Rotated to 8 specialty acute care settings in a 700-bed hospital

- Communicated effectively with patients, family members, physicians, and coworkers
- Monitored patients closely for changes in condition and advocate as needs arise
- Enhanced patient condition by coordinating care with various therapies and resources (PT, OT, RT, ST, pharmacy, chaplain, laboratory)
