Professional Summary

Results-driven software engineer with a passion for creating impactful features and driving innovation.

Experienced in high-velocity code development and a mentor to peers.

Seeking opportunities to contribute technical expertise and collaborative skills to a dynamic team.

Employment History

Software Engineer, Theorbitpixel, Sango

01/2020 - 01/2022

- Collaborated with product management, design, and AI teams to develop high-impact features, contributing to Virta's mission.

- Shipped complex features across web and mobile apps, ensuring high-quality, well-structured code.

- Mentored peers and partnered with engineers to improve platforms, implement best practices, and enhance tools.

- Troubleshot and resolved issues in both production and non-production environments.

- Managed application performance and usage in the production environment.

- Became a go-to expert for critical foundational technologies within Theorbitpixel.

Full Stack Developer, ESO media, Ikorodu

01/2022 - Present

As a Full Stack Developer at ESO Media,

I played a pivotal role in the design, development, and maintenance of web applications that delivered engaging user experiences and met business objectives.

My responsibilities spanned both front-end and back-end development, allowing me to contribute comprehensively to the entire software development lifecycle.

Key Achievements and Responsibilities:

- Collaborated closely with cross-functional teams including product managers, designers, and fellow developers to define project requirements and create effective technical solutions.

- Developed and implemented front-end features using modern JavaScript frameworks like React, ensuring seamless user interfaces and responsive designs.

- Designed and implemented RESTful APIs and integrated them with the front-end using technologies like Node.js, Express, and GraphQL, enabling efficient data flow and interaction.

- Utilized database technologies such as MongoDB and MySQL to manage data storage and retrieval, optimizing application performance and data integrity.

- Led efforts to enhance application security by implementing authentication and authorization mechanisms, safeguarding user data and privacy.

- Actively participated in code reviews, providing constructive feedback to peers and upholding coding standards to ensure code quality and maintainability.

- Collaborated in an Agile development environment, attending daily stand-up meetings, sprint planning, and retrospectives to ensure timely project delivery.

- Contributed to the optimization of the development workflow by introducing tools like version control (Git) and continuous integration (CI/CD) pipelines.

- Proactively troubleshooted and resolved software defects, ensuring the smooth functioning of applications in both development and production environments.

- Mentored junior developers, sharing knowledge, providing guidance, and fostering a culture of learning and growth within the team.

During my tenure at ESO Media, I successfully contributed to the launch of several web applications that

received positive user feedback and contributed to the company's growth.

The experience allowed me to refine my skills in full stack development, project collaboration, and problem-solving,

positioning me as a capable and adaptable professional in the field of web development.

Education

Bachelor, Harvard University, Cambridg

01/2016 - 01/2020

I graduated with high honors,Bachelor of Science in Computer Science.

Courses

Javascript and C#, Freecodecamp

01/2022

Java,Python and javascipt, Code.mosh.com
