

MD SOHRAB

SOFTWARE ENGINEER

As a recent graduate, I possess comprehensive knowledge spanning multiple domains, notably excelling in Web Development. Proficient in Python, Machine Learning, as well as CSS and HTML. A reliable team player, I am equally skilled at independent tasks. My rapid learning curve and innate adaptability enable seamless role transitions. Evidencing competency, diligence, and collaborative prowess, I consistently contribute within team environments

Enhanced Version: "Embarking on a 6-month journey into the realm of machine learning with Python, the college course delved extensively into the realms of data science and deep learning, equipping students with invaluable skills to enhance their Python prowess. The curriculum also introduced unique strategies to optimize code and foster creative problem-solving."

TECHNICAL SKILLS

PYTHON

I have completed two to three projects using Python. Additionally, I gained proficiency in machine learning through a college course, where I developed a digital calculator. Furthermore, I collaborated with a group to create a chatbot project.

CRYPTOGRAPHY

Participated in a comprehensive college cryptography course, enriched by collaborative bootcamps. Strengthened my skills while exploring advanced encryption techniques and their real-world applications

HTML&CSS

I possess advanced knowledge of HTML and CSS, demonstrated through the creation of two to three projects, including an online payment system and an online showroom. I acquired these skills through online platforms.

MACHINE LEARNING

Completed a rigorous 6-month college course focused on Machine Learning with a specialization in Python. Passionately engaged with the curriculum and gained hands-on experience in diverse ML techniques, enhancing proficiency in data preprocessing, model building, and evaluation. Eager to leverage this foundation in future data-driven projects.

DATA STRUCTURES

Possess foundational understanding of Data Structures through college coursework and GATE preparation. Proficient in fundamental concepts, including arrays, linked lists, stacks, and queues. Eager to apply knowledge in practical programming and problem-solving contexts.

PROJECTS

Chatbot

- Base on college manor project

Social Media Marketing

- It took a lot of hard work to make this project and taught time management and communication it became a final year project.

Digital Calculator

- I made this digital calculator in 2 hours and had a lot of fun using it

Vartual Assiant

- My personal Assiant made me with using Python
