About Me

Extremely motivated to constantly develop my skill and grow professionally. I am confident in my ability to come up with interesting ideas.

Professional Experience

Nimblekart.com | Jr. Software Engineer

oct-2022 to present

- During this time most important things I learned included how to work in the business context
- How to work on products.
- Experienced in user interface (UI) design principles and software implementation
- Experience with JavaScript, HTML, and CSS
- Ability to effectively work within a small, dynamic team by taking initial guidance, independently producing functioning software, and responding to feedback.

Achievements

2022 — Successfully launched and run a prototype model of Nimblekart.com
