INTEREST

UI Designer
Front end development
Graphic Designer
Web Design
HTML and CSS knowledge
Wireframes

PROJECTS

PNG life —

In this project I have created a web from which we can see rent house or PG's by selecting the area. And here we can also get the information about what facility we get from owner or by taking rooms.

Mental health tracker —

In this project we will try to get an idea of the mental state of the user (Patient), find out if they are suffering from any psychological problem and then our virtual psychologist will suggest them some methods so that they can heal out from their present conditions.

CERTIFICATIONS AND ACHIEVEMENTS

C Programming

Java

Web development
