PROFESSIONAL PROFILE

I am a compassionate and dedicated Family Nurse Practitioner with experience in community health. I currently practice patient-empowered, primary care at a federally qualified health center in New York City, where I initially completed a highly selective and rigorous fellowship program. I have extensive experience in managing the complex cases of patients suffering multiple comorbidities and I am committed to bringing this expertise to community health practice.

EXPERIENCE

FAMILY NURSE PRACTITIONER – PRIMARY CARE PROVIDER

Community Healthcare Network: NY, NY; September 2021- current

- Provides exceptional and patient-informed care to patients of medically underserved communities consisting of low-income and uninsured New Yorkers.
- Independently manage a panel of 1500+ pediatric and adult primary care patients in multiple outpatient clinics and settings
- Daily productivity goal of 23 patients per day
- Conducted most appointments in Spanish
- Assess, diagnose, and treat multiple chronic comorbidities, including cardiac, pulmonary, sexually transmitted, gastrointestinal, musculoskeletal, renal, hepatic, and psychiatric illnesses, in addition to addressing acute concerns via in-person and telehealth examinations
- Often served as the sole provider on site, managing acute concerns and directing the clinic staff while attending to a full patient panel

FAMILY NURSE PRACTITIONER FELLOW

Community Healthcare Network: NY, NY; September 2020-September 2021

- Participated in a rigorous and comprehensive fellowship program while providing high-quality, patient-centered primary care to persons suffering restricted access
- Independently managed a panel of 500+ mostly Spanish-speaking pediatric, adult, and geriatric primary care patients
- Daily productivity goal of 18 patients per day on completion of post graduate training year
- Assess, diagnose, and treat patient with multiple chronic comorbidities and acute concerns through in-person and telehealth examinations
- Conduct training sessions for nursing staff and care coordinators on chronic condition evaluation, treatment, and management
- Complete clinical and didactic trainings in specialty practices including cardiology, gastroenterology, infectious disease, ophthalmology, orthopedics, pain management, pediatrics, podiatry and women's health.

EXPERIENCE

REGISTERED NURSE – OUTPATIENT FLOOR NURSE

Charles River Community Health Center; Boston, MA; September 2019- August 2020

- Transitioned between on-call triage nurse as well as outpatient floor nurse working 30 hours a week while completing graduate school
- Triage emergency phone calls, identified emergent versus nonemergent concerns, and resolved patient matters through the on-call nursing service
- Assisted providers in monitoring vital signs, completing weight checks, performing injections, and assisting in outpatient procedures
- Independently performed nursing visits to monitor the treatment of hypertension, diabetes, latent tuberculosis, warfarin, continuity of contraception. Completed assessment and medication reconciliation, developed a plan, reported to the provider, and provided patient education
- Worked with primary care providers to provide patient-informed care in the management of multiple comorbidities including heart failure, asthma and COPD

REGISTERED NURSE – INPATIENT FLOOR NURSE

Boston HOPE Project; Boston, MA; April 2020 - May 2020

- Collaborated with the interdisciplinary healthcare team at a field hospital dedicated to providing quality care to the homeless and impoverished community of Boston suffering from COVID-19
- Administered medications, addressed changes in clinical status, monitored vitals, conducted physical assessments and managed 5 patients per 12-hour work shift
- Attended clinical rounds among an interdisciplinary team and provided report to the supervising clinicians and following care team
- Ensured consistent delivery of compassionate care and support to patients suffering the fear and isolation brought on by the COVID-19 pandemic

REGISTERED NURSE – VISITING NURSE

Maxim Healthcare Services; Needham, MA; November 2018-September 2019

- Served as the sole registered nurse responsible for a panel of 20-50 patients in various facilities such as adult daycares, rehabilitation centers and schools
- Substituted at a new site each shift. Required to learn and implement the workflow of the healthcare staff in order to provide a seamless transition of care
- Responded to patient's daily needs, monitored vital signs, documented input and output, performed full body assessments, administered medications and controlled substances, provided wound care and changed colostomy bags
