WORK EXPERIENCE

1- WEB DEVELOPER   JUN-2021 - AUG-2023
And SEO EXPERT

at Netsense Technologies

Designed and developed responsive websites using HTML, CSS, JavaScript and Wordpress for a seamless user experience. Give great results in SEO.

PROJECTS
Front-End Based

Netflix Landing page

In this project the technologies used are HTML , CSS,BOOTSTRAP and is completely customisable and is also an exact clone of the original netflix and it is also reponsive and would work on any device hassle-free

MeetYourPsychic.com

This is a clone of MeetYourPsyChic website with a Responsive featue and it deals with all the ASTROLOGICAL problems like Horroscope,Fortune telling etc.
In this cloning i have extensively used HTML,CSS,BOOTSTRAP-4

PYTHON BASED

QR code Creator

This Project is based on Python and it's various libraies
It solves the problem of sharing data because now we just have to paste the URL of anything and it will be converted into a QR

Video Downloader

This project is one stop solution for all the video downloading problems
You can download video from any website or app like YOUTUBE,INSTAGRAM etc.

JavaScrpit Based

Form Validations

This app is based on Javascript and IF loop is extensively used to create multiple validations and This form is exactly like many sign up pages

Annual Budget

This app is based on Html,css,javascript,bootstrap. It solves all the budegting problems of an individual with it's easy to use and interactive UI and a track feature that helps users to keep track of their prior expenses

Node.js Based

Dynamic Website-Restro

This is a dynamic website of restaurant. Used to order food like swiggy,Zomato,etc .In this website, we use Mongodb as database, Node.js for backend,and Express.js for routing and we use google maps API to track our order and attached payment gateways for ease of online payment .In this website client can update website data from Mongodb by its own.

React.js & API Based

News App

This is news app Which we used to read daily top- headlines of various category like sports, entertainment, technology, health, etc. We use Reactbootstrap to design front-end, React.js to apply some logics in frontend, fetch API function to use News API which gives daily new content to website.
