## **SERVICES**

### **SERVICE TO THE DEPARTMENT:**

I have been able to become acclimated to various positions at once. I have advocated for those who, for whatever reason, could not advocate for themselves. I have navigated physicians to accept the patient's wishes for abstaining from blood due to religious and other personal reasons. I have been the bridge for the mentally challenged patients, helping them to receive the optimal medical care and treatment at appointments, procedures, and surgeries.

### **SERVICE TO THE COMMUNITY:**

I have been an ordained minister since July 2008. I have ensured holistic care in the community by assisting individuals with their spiritual needs as well as physical, emotional, and medical needs.

### **SERVICE TO THE PROFESSION:**

My goal is to become a family nurse practitioner, serving the residents of Dillon County and surrounding areas. I would like to integrate the cultural, social, and behavioral factors that will help in my delivery of holistic health services. I would like to promote holistic

wellness by encouraging self-care and prevention of illness through education, counseling, screenings, prevention, and health promotion.
