Clinical Rotation Summary

Internal Medicine – East Metro Internal Medicine, Conyers, GA

- Performed CCM visits over the phone with established Medicare and Medicaid patients
- Assisted with obtaining vitals and triaging a few patients per day
- I was relocated from this rotation after 3 weeks due to concern from both the school and I that I was not receiving a proper educational experience

Internal Medicine – L&H Internal Medicine, Atlanta, GA

- Provided both primary and urgent care to patients
- Performed complete physical examinations and assessments of patients before consulting with Dr. Hasso.
- Selected and ordered appropriate diagnostic testing and imaging to augment physical findings
- Monitored and adjusted medications and treatment plans if needed under supervision of Dr. Hasso
- Documented patient history as well as all exam findings, diagnoses, and treatment plans.

Behavioral Health/Psychology – Appalachian Counseling and Psychological Services, Asheville, NC

- Documented new patient histories from both a psychological and medical perspective including all current and previous medications, providers, and treatments
- Presented patient cases to Nichole Onash, PA-C and discussed treatment options for MDD, GAD, PTSD, bipolar, OCD, autism, ADHD, somatic disorders, and other personality disorders.
- Assessed patients current psychological state using different scales and up-to-date DSM-V criteria.

Elective rotation: Plastic Surgery – Atlanta Plastics & Reconstructive Specialists

- Participated in a variety of different plastic and reconstructive procedures including first assist, second assist, suturing, stapling, and drain insertion for 3 different plastic surgeons.
- Procedures and surgeries participated in include breast augmentations, breast reconstructions, mastectomies, DIEP flaps, latissimus flaps, abdominoplasties, liposuction, rhinoplasties, deep plane facelifts, mastopexies, and genioplasties.
- Pre-op examination, management, and patient education on their incoming procedure
- Post-op management including drain removal, dressing changes, patient monitoring, and patient education

Women's Health – The Howard Center, Covington, GA

- Performed and observed routine GYN procedures including pap smears, breast examinations, pelvic ultrasounds, I&D insertions and removals, and speculum exams
- Participated in a variety of different gynecologic surgeries including partial hysterectomies, complete hysterectomies, oophorectomies, dilation and curettages, endometrial ablations, and myomectomies
- Post-op examinations in a clinical setting including patient education on their incoming prospective procedures and pre-op lab result interpretation
- Post-op management including wound care, dressing changes, and patient monitoring

Pediatrics – North Point Pediatrics, Alpharetta, GA

- Participated in both primary care and urgent care visits in pediatric patients ranging from neonates to late adolescents.
- Performed and interpreted results of physical examinations, rapid lab testing, urinalyses, and imaging.
- Documented exam, laboratory, imaging, and history findings in patient charts.
- Managed treatment plans under the supervision of Dr. Cabrera and performed patient education on diagnoses and treatment plans.

Family Medicine – Temple Medical Center, Villa Rica, GA

- Performed preventative care through routine health screening and physical examination
- Monitored and adjusted medications and treatment plans if needed
- Ordered and interpreted diagnostic testing such as laboratory, EKGs, and radiological images to augment physical finding for the diagnosis
- Provided appropriate patient education based on their current diagnoses as well as medications
- Documented patient encounters including histories, physical findings and examination, assessment, and treatment plan

Emergency Medicine – Piedmont Hospital Fayette, Fayetteville, GA

- Triageed and evaluated level 2,3, and 4 acuity patients
- Performed complete focused-history taking and physical examination
- Selected and ordered appropriate diagnostic testing and imaging
- Reviewed laboratory and radiological tests including CBC, CMP, Troponin, d-dimer, CRP, UA with reflux, x-rays, pelvic ultrasounds, doppler ultrasounds, CTs, CTAs, and MRIs for pathology
- Performed procedures including laceration repairs, fracture reduction, castings, digital blocks, and incision and drainage under supervision

General Surgery – Piedmont Hospital Atlanta Hepatobiliary/Surgical Oncology, Atlanta, GA

- Participated in a variety of different general and oncologic surgical procedures including first assist, second assist, robotic assist, suturing, stapling, wound vac placements, and drain insertion for 4 different surgeons.
- Procedures and surgeries participated in include Whipple procedures, total and sub-total gastrectomies small bowel resections, cholecystectomies, hepatectomies, wide local excisions of melanomas, lymph node resections, adrenalectomies, pancreatic debridements, hernia repairs, and colectomies
- Rounded on PACU, ICU, hepatobiliary, and oncology floor patients. Performed problem-focused physical exams on a variety of different diagnoses.
- Pre-op management and patient education on their incoming procedure
- Post-op management including inpatient monitoring, diet management, drain removal, dressing changes, wound vac exchanges, patient monitoring, lab interpretations, and patient education
