Production Support : Accenture IDC, Bangalore

Client : Liverpool

Platform & Skills : Lotus notes R5.

TOOLS USED : Lotus Script, formula language, JavaScript, HTML, DHTML

Duration : March 2005 – June 2005

Role : Development & Support

Scope:

In Accenture, we are take part in the IDC team &our client was in Liverpool. We are giving solutions for our client issues for our Productions server. Totally we are handling 69 applns. With 2 categories North & South applications with the priority of High, Low, Medium. So they are providing Training for me for frequent issues as comes from our client side. Otherthan we are doing the routine process of open a call, assign our client's issues & talk with them on their availability time & give solutions before the breach date.

I am currently involved in setting up offshore DBA and LOTUSNOTES Production support facilities/structure for IDC team Accenture. I am also involved in providing LOTUSNOTES Production support for our client Liverpool.

After June'05 onwards they put me in maintenance of projects with my colleagues & we are attending the training in EBC Training & to attend CMMi level training also. That will goes up to Aug'05 & then they close my contract & then I will be in bench for one month & they ask me relocate to Mumbai Accenture. But I told that I looking for a permanent offer.

Role: As a Team Member I was involved in analysis and development of this System.

Responsibilities:

Involved in Analysis, Designing and Coding of this Database.

Support for the system.

Project Name : QCT (Query Communication Tools) Delta

Client : Gillette Latin America.

Platform & Skills : Lotus notesR5 & Windows 2000.

TOOLS USED : Lotus Script, formula language, JavaScript, HTML, DHTML.

Duration : Nov '04–Dec'04

Role : Developer

Scope:

The QCT (Query Communication Tool) Delta is a request management tool used by Financial Shared Service Center in Gillette Latin America. It captures various routine requests like Accounts Payable Request, Accounting Payable Request, Payroll/ Payments request etc in the financial community and facilitates speedy approvals. The Results are exported SAP Automatically. This application will be developed in Lotus Notes R 5.0.8 server and will be accessed from Notes client.

After Dec'04 they relocate my position to B'lore Patni & told they told that we are waiting for the Client Feedback for to hire my position. So I am waiting up to middle of Feb'05 & then I got the offer at Accenture & joined through Dynpro consultant.

Role:

As a Team Member I was involved in analysis and development of this System, as a Sole developer.
