📁 Professional Experience

Decagon

.NET Software Engineer

04/2023 – present
Lagos, Nigeria

- Solved client needs by building new custom software, enhancements, bug fixes, or consulting.
- Developed new applications and features using industry standard best practices.
- Follow systems engineering, development, and deployment best practices
- Collaborated with cross-functional teams to integrate third-party APIs, enhancing app functionality
- Provide code feedback to other developers through pull request reviews.
- Mentor and direct junior developers
- Deploy software in a well-planned manner with complete coordination with designated end users.

DANN Technologies Solutions

Software Engineer

08/2019 – 05/2022
Lagos, Nigeria

- Contributed to the development of ASP.NET web applications using MySQL, Redis, MS-SQL Server, gaining practical experience in web development methodologies and best practices
- Demonstrated the ability to work effectively in a team environment and balanced independent work as well as working with others.
- Interpret business technical and functional requirements and design client server and Internet Based Software solutions to meet those requirements.
- Successfully designed and implemented high-performance .NET backend systems, resulting in a reduction in response times and a decrease in server resource utilization.
- Met with clients to help craft technology solutions that meet their business needs and estimate the effort required to deliver.
- Active participation in code reviews, contributing to code quality enhancements.
