CAREER SUMMARY

Driven, focused, and a team player when it comes to software engineering in general, and with communication based, hands on experience, especially with Javascript and its frameworks like React and Node.js. I intend, while working as a team, to contribute my quota not just to software development but to the progression of the tech age with innovative and creative solutions.

WORK EXPERIENCE

Front End Developer/Technical Support Lead

FriendnPal - December 2022 to June 2023
RESPONSIBILITIES AND ACHIEVEMENTS:

➢ Worked with an agile team of 20 on the FriendnPal project, particularly on the front-end web app.
➢ Optimized the FriendnPal Website UI/UX experience, and created access points for APIs.
➢ Provided IT support, troubleshooting and system operations.
➢ Added more reusable code to the FriendnPal codebase, thereby enhancing the codebase.
➢ Worked with a reputable team of developers in building the FriendnPal codebase.

Lead Software Developer/Team Lead

Matic Drive - December 2022 to June 2023
RESPONSIBILITIES AND ACHIEVEMENTS:

➢ Lead an agile team of 10 working remotely on the Matic Drive AI/autonomous vehicle interface software, optimizing it with consumer features.
➢ Optimized the Matic Drive Website, increasing traffic on the site and ensuring appropriate UI/UX experience.
➢ Assisted in designing an AI model for autonomous vehicles for tough terrains.
➢ Ensured code synchronicity and optimization on the project from all developers.
➢ Added more reusable code to the Matic Drive codebase, thereby enhancing the codebase.
➢ Assisted in the human resource department as regards selection of competent developers for the project.

Software Developer/Mobile App Developer

Alabian Solution Institute Lagos - November 2021 to November 2022
RESPONSIBILITIES AND ACHIEVEMENTS:

➢ Worked with an agile team of 5 on the Vampfi website, optimizing it with consumer features.
➢ Optimized the Vampfi UI/UX experience, increasing traffic on the site by 25%.
➢ Worked with a reputable team of developers in building the Glo Battle of the Year website, which was designed for online participant processing.
➢ Participated in the Trialty Hackathon, and was awarded a top 30% programmer.
➢ Added more reusable code to the Vampfi codebase, aiding optimization from other team members.
➢ Worked with an agile team of 4 on the Arcromride mobile App, an online taxi booking app based in the UK.
➢ Worked on personal projects as career milestones throughout my stay there.
