EXPERIENCE

Lagos Data School, Ikeja Lagos — *Data Analysis Instructor*

July 2023 - PRESENT

- Training Facilitation: Successfully trained beginner-level students in Python, SQL, Power BI, SPSS and Excel.
- Capstone Project Coordination: Coordinated captivating capstone projects for learners' portfolios, providing hands-on experience in real-world data analysis scenarios.
- Mentorship and Guidance: Mentored students throughout their learning journey, providing personalized guidance and support.
- Progress Assessment: Assessed learners' progress, identified areas of improvement, and provided constructive feedback.
- Curriculum Development: Stayed up-to-date with the latest developments in data analytics tools and technologies to ensure the training curriculum remains effective.

Primo Group, Nigeria — *Data Analytics Intern*

August 2022 - November 2022

SQL Masterclass:

- Developed skills in writing complex SQL queries to extract data from large databases.

Python for Data Analysis:

- Developed proficiency in Python programming language and applied it to data analysis.
- Utilized various Python libraries such as NumPy, Pandas, Seaborn, and Matplotlib to analyze large datasets.

Data Cleaning and Manipulation with MS Excel:

- Demonstrated proficiency in data cleaning and manipulation using MS Excel.
- Developed skills in using Excel functions such as XLOOKUP, VLOOKUP, INDEX-MATCH, Pivot Tables, and Conditional Formatting to clean and transform data.

SKILLS

Technical Skills:

- SQL: Proficiency in writing complex SQL queries to extract and analyze data from large databases.

- Python: Experience in using Python for data analysis, including data visualization and building machine learning algorithms.

- Data Visualization: Familiarity with data visualization tools such as PowerBi.

- Statistical Programming Languages: Knowledge of statistical programming languages like Python and SPSS for statistical computing and analysis.

- Excel: Proficiency in data cleaning, manipulation, and analysis using Excel functions and tools.

Analytical Skills:

- Data Analysis: Expertise in organizing, interpreting, and analyzing complex datasets to identify trends, patterns, and insights.

- Statistical Analysis: Ability to apply statistical methods and techniques to analyze data and draw meaningful

Data Engineering Essentials - ETL & ELT Pipeline, Azure Cloud Services:

- Gained expertise in designing and implementing ETL & ELT pipelines using Azure cloud services.
- Developed skills in using Azure Data Factory, Azure Databricks, and Azure Synapse Analytics to build scalable data pipelines.

Big Data Technologies - Apache NiFi Basics:

- Acquired knowledge of Big Data technologies and gained expertise in Apache NiFi basics.
- Developed skills in building data pipelines using Apache NiFi to process large datasets.

Data Visualization with Power BI:

- Demonstrated proficiency in data visualization using Power BI.
- Developed skills in creating interactive dashboards and reports to visualize complex data.

conclusions.

Communication Skills:

- Data Reporting: Ability to communicate complex findings and insights through clear and concise reports or visualizations.
