### MAJOR PROJECTS

- **Oxygen Tracker and Store (Mar, 2021 - Mar, 2021) :**
  - A website created during Covid-19 using HTML,CSS JavaScript that shows the availability of oxygen cylinders in the nearby vicinity of a person.
  - I have included links to other websites which give information of different Vendors who had those oxygen cylinders.
- **2D- Snake Game (Apr, 2021 - Apr, 2021):**
  - A simple game where a snake moves around a box trying to eat an apple. Once it successfully eats the apple, the length of the snake increases and the movement becomes faster.
  - In the implementation of this project HTML, CSS, JavaScript has been used
- **Twitter sentiment analysis (July, 2021 - July, 2021) :**
  - Twitter sentiment analysis allows you to keep track of what's being said about your product or service on social media, and can help you detect angry customers or negative mentions before they they escalate.
  - I have used two function 'getSubjectivity' and 'getPolarity'. Subjectivity tell us what the person is thinking whereas polarity tells about the tone of the text used.
- **Online Shopping Website, Redstore (May, 2022 - June, 2022) :**
  - The Online Shopping is a web based application intended for online retailers. The main objective of this application is to make it interactive and its ease of use.
  - Developed websites from front to backend using PHP, JavaScript, and HTML.
