Restaurant app

<https://zeeshanfront.github.io/Resturant-app/>

May 2022

This is a website based on React JS.

Todo-app

<https://zeeshanfront.github.io/ToDo-app/>

April 2022

This is a To do-app based on React JS. In this app we can add, delete and edit the data. we can also remove all the data in a single button. It doesn't matter how many times we refresh the data, it remains there due to local storage.

Weather app

<https://zeeshanfront.github.io/weather-app/>

November 2022

It is a weather application app where we deal with real world API . Here all the data we get with the help of real world api. In this app we get the temperature and other details of any city of all over the world.
