Database - my sql

GIT HUB PROJECTS

SPEECH-TO-TEXT

A React project for speech-to-text conversion, Speak, it types! Talk, and it transcribes to text. Super handy for quick note-taking and writing without a keyboard.
https://github.com/Sposmruti/speech-to-text

TODOS-LIST

A simple React-based todo list app.It helps you add, remove, and check off tasks. The app quickly updates what you see on the screen so you can use it smoothly.
https://github.com/Sposmruti/todos-list

RACING GAME

Thrilling racing game: HTML, CSS, JavaScript. High-speed action, stunning graphics, and intense competition. Race to victory now!
https://github.com/Sposmruti/Racing-Game

SPOTIFY CLONE

Create a Spotify clone with HTML, CSS, and JavaScript to play music, build playlists, and explore a vast library.
https://github.com/Sposmruti/spotify-clone

DARGON GAME

Build an exciting dragon game using HTML, CSS, and JavaScript. Make cool dragons, epic fights, and awesome backgrounds. Add fun quests and challenges for players to enjoy.
https://github.com/Sposmruti/Dargon-Game

SNAKE GAME

Create a fun Snake game with HTML, CSS, and JavaScript. Control the snake, collect food, and grow longer. Avoid collisions for a high score!
https://github.com/Sposmruti/Snake-Game

CALCULATOR

Build a user-friendly calculator using HTML, CSS, and JavaScript. Perform basic math operations with ease.

https://github.com/Sposmruti/Calculator

TIC-TAC-TOE

Make a Tic Tac Toe game using HTML, CSS, and JavaScript. Play against a friend, get three in a row, and have fun!

https://github.com/Sposmruti/tic-tac-toe

JOB-APPLICATION-WEBSITE

Build a job application website using HTML and CSS. Simplify job hunting and present your qualifications.

https://github.com/Sposmruti/job-application-website
