Having around **3 years** of corporate experience in Android development Rest API and Web Services, Google Maps, Services and Broadcast Receiver, FCM Push Notification, Material Design, Third Party Library, Firebase Crashlytics Recycler View, Networking Library, Manual Testing, MVC, SQLite, Jetpack Library. I have completed 6 project end to end.

PROFESSIONAL EXPERIENCE

- **Technodroidz (26/Nov/21 till Android Developer),** Noida.
- **Fiducia Solutions Noida (April 2021 to October 2021),** Designation: Intern. Android Developer,
- **6Benches Bangalore (July 2019 to Nov 2019)**
- Designation: Intern. Android Developer,

STRENGTHS

- Understand the full requirement of client.
- Generate a software development life cycle of projects
- Strong knowledge of Android for development using Java and Kotlin.
- Hand practice in Rest API and Third party library/API.
- Hands on to find errors and bugs and resolve it instantly.
- Hands on to work on projects and quality and delivery on time.

PROJECTS

1) **FiscoClicPeople:**

- a) This App allows Employee to check-in and check-out with a single click with real-time geolocation.
- b) It allows to check the employee profile information, hours and days of work assigned.
- c) Authentication with a fingerprint from the App and the linking of mobile devices for each employee.
- d) QR Check, which allows you to scan your QR code in the workplace without contact with physical devices.
- e) Connect the attendance list with the incident calendar automatically and calculate the payroll with the approved incidents.
- f) Integrated WebView to enable face authentication through a web-based service. Utilized JavaScript to communicate with the web service and obtain the authentication token. Allow check-in or checkout based on successful face authentication and matching tokens.

- ## 2) **CvLiquors:** It is an alcohol delivery app, making it easier than ever before to search for on-demand liquor based on your location.

Play Store Link: <https://play.google.com/store/apps/details?id=com.counterview.app>

- ## 3) **QuickRecall:** This App has its own Built-in Notepad which is used for both saving new documents and updating old documents.
- a) The app provides a user-friendly interface for quick and easy note-taking.
 - b) Users can create new documents and save them with relevant titles and content.
 - c) Existing documents can be easily updated and edited within the app.
 - d) The app's offline mode ensures that users can access and edit their notes even without an internet connection.

Play Store Link: <https://play.google.com/store/apps/details?id=com.app.quickrecall>

- ## 4) **Survey SDK:** Successfully launched the Android Survey SDK, empowering numerous apps with the capability to conduct surveys and collect valuable user feedback, resulting in increased user engagement and satisfaction.

5) **Commz Business :**

- a) Business owners can register their business through the app by providing necessary details like business name, address, contact information, and business category.
- b) The app will offer different subscription plans for businesses to choose from.
- c) The app should integrate a secure stripe payment gateway for handling subscription payments.
- d) The app should send real-time notifications for incoming messages to ensure timely communication.

6) Commz Client:

- a) The client application will display a list of businesses based on the client's nearby location.
- b) Clients can search for specific businesses or filter businesses based on categories and services offered.
- c) Clients can initiate conversations with businesses through real-time chat for booking services or making inquiries.
- d) When a client books a service, the respective business will receive a notification regarding the booking.
- e) Businesses can confirm or reject the booking request and notify the client through the chat.
