## Summary

I'm a UX/UI Designer specialized in creating interfaces that drive acquisition, activation, and optimize design investments. I excel at turning complex challenges into intuitive solutions, enriching user experiences from problem-solving to interface design.

## Experience

### Product Designer

Breeze

Jun 2023 - Present (5 months)

Collaborated with cross-functional teams to design and upgrade dashboard interfaces for Breeze, a finance company specializing in supporting African supply chain businesses.

Created unique and engaging mobile interfaces that improved user engagement and accessibility.

Conducted user research and gathered feedback to inform design iterations, resulting in enhanced user experiences and increased user satisfaction.

Translated business requirements into compelling design solutions, considering the unique needs and challenges of the finance and supply chain industry in the African market.

Worked closely with developers to ensure seamless implementation of UI and web designs and resolve any UI-related issues during development.

### User Interface Developer

OnlineCourseHost.com

Oct 2022 - Apr 2023 (7 months)

OnlineCourseHost.com is a user-friendly white-label platform for hosting online course creators.

Utilized design tools such as Figma and GIMP to create designs, and implemented them using CSS in an Angular development environment, resulting in the successful redesign and launch of new platform features including a design system, login and signup page, and a new landing page.

### Web User Interface Designer

Kampgig

May 2022 - Jun 2022 (2 months)

Collaborated remotely with a cross-functional team of frontend and backend developers at Kampgig, an e-commerce company focused on selling items for campus students.

Designed and implemented Kampgig's new web app store design, utilizing tools and technologies such as Figma and CSS.

Collaborated with UI developers to optimize the design for a better user experience, resulting in over 10,000 users accessing services in Nigerian campuses through Kampgig's platform.

## **User Interface Designer**

Pursuant

Jul 2021 - Feb 2022 (8 months)

As a freelance UI Designer, I worked remotely with the cross-functional team of frontend and backend developers at Pursuant, a legal tech startup that provides legal services to the general public. In this role, I collaborated with the team to create a simple and intuitive web product that serves users in a limited legal capacity.

## **Intern**

HNG Internship

Aug 2021 - Sep 2021 (2 months)

Interned as a frontend developer using the react framework. Participated in the development of micro-service web app called ZuriChat.

## **Frontend Developer**

ZuriChat

Aug 2021 - Sep 2021 (2 months)

Contributed significantly as a Frontend Web Developer Intern using the React framework in the development of ZuriChat, an end product developed by a cross-functional team consisting of backend developers, frontend developers, and product designers.

Actively participated in the development of the Calendar plug-in, making UI changes and providing daily commits to the codebase on GitHub, ensuring the successful launch of the end product.

## **Education**

### **Rivers State University of Science and Technology**

Bachelor of Engineering - BE, Electrical and Electronics Engineering

## **Licenses & Certifications**

### **Jobberman Soft-Skills Training - Jobberman Nigeria**

3930040

### **Responsive Web Design - freeCodeCamp**
